

FABRIC SUITABILITY FOR END USE

millar textiles

We stock a variety of fabrics for various end-uses. Most of the time we are unaware as to what use the fabric is being utilised for.

For example:

- Fabrics used in hospitals need to withstand industrial wash,
- Curtaining fabric need good light fastness,
- Colour blocking could be problematic in example utilising Black/White, Red/White within the same garment – colour could migrate.

NB: REFER TO OUR CARE LABEL AS A GUIDE:

WASH DARK COLOURS SEPARATELY

Please note:

When purchasing fabric, we strongly suggest you conduct your own wash/wearer test trial for your specific end-use – PRIOR TO CUTTING BULK.

ONCE FABRIC IS CUT AND/OR PROCESSED, NO CLAIM WILL BE ENTERTAINED WHATEVER THE REASON. THIS IS A CONDITION OF SALE.

Only uncut rolls of fabric in the original packaging can be returned for credit within the month of Invoice only.

NB: Refer to our sales team who will advise accordingly.
